Benoît LANDI, PhD

Research Engineer

+33 6 62 86 18 10 | benoit.landi@gmail.com | Aix-en-provence, France | Portfolio : whitebenoit.github.io/en/

PROFESSIONAL SUMMARY

Computer Science and Serious Game PhD graduate with a scientific research background on Tangible User Interfaces and over 5 years of experience as both a developer and a game designer. Seeking opportunities to leverage my technical expertise and creativity for your innovative and data-driven projects.

EXPERIENCE

Research Engineer – Serious Games **09/2019 – 05/2024, INU Champollion, Albi**

Designed a serious game for teaching telehealthcare for ESNbyUM and Furii Dem@ter, €8 million French government projects. Designed the game mechanics to fulfil all educational requirements. Built the game using Unity, C#, and JSON. Managed project coordination and client relations. Cooperated within an interdisciplinary team of professionals outside the video game industry.

Game Designer on King Crusher (iOS & Android) **07/2018 – 12/2018, Ankama, Roubaix**

Designed the content (heroes, classes, enemies, items, and random events) and levels of a 4.7/5 mobile game with 500,000 downloads. Coded a player-analysis tool in Python. Designed the game's business model.

Java Programmer **03/2016 – 08/2016, Sopra Steria, Valencia (Spain)**

Developed a Java back-end application, including maintenance and evolution. Designed and built an API using Selenium Webdriver to automate application testing.

Java Programmer **05/2015 – 08/2015, Sopra Steria, Albi**

Designed and developed an architecture analysing tool in C#. Modified the architecture of a Java application to make it compatible with Maven. Implemented SonarQube, a code quality analysis and automated testing tool.

EDUCATION

Computer science PhD **10/2019 – 07/2023, INU Champollion, Albi**

Studied the benefits of tangible user interfaces using A/B testing. Developed using Unity's C# and used C++ for DLL. Authored or co-authored four peer-reviewed scientific papers and participated in scientific conferences and events. Taught Game Design for postgraduates (serious game focused Master named AMINJ).

Master "Interactive Digital Experiences" **10/2017 – 01/2019, Les Gobelins and CNAM-ENJMIN, Paris**

Developed multiple Unity game projects: "Office Ninja", a satirical stealth metroidvania game; "Xplosive truck", a game based on "Le salaire de la peur"; and "Emoji'rouette", a narrative game around a chat application. Designed the games, their levels, and their narrative elements. Managed projects and client-to-developer relations.

General Engineering **09/2013 – 11/2016, École des Mines d'Albi-Carmaux, Albi**

Received a broad scientific education (mechanical, materials, optics, chemistry, computer engineering, agile development, and industrial processes). Developed scripts and applications in Java, Perl, JavaScript, Python, and VBA/Excel. Managed a team of up to 7 people on projects involving documentary research, market analysis, solution design, and development.

SKILLS

- **Programming languages:** C#, C++, Java, JavaScript, Python, JSON, XML, SQL, Perl
- **Software:** Unity, Godot, Visual Studio, Eclipse, MS Office Suite, Photoshop, Illustrator, Krita, Blender
- **Areas of expertise:** Object-oriented Programming, Game Design, Level Design, Project Management, Data Analysis, User Experience, Problem Solving, Creative Thinking, Scientific Research and Publications
- **Spoken Languages:** French (Native), English (Bilingual– TOEIC 965/990) and Spanish (B1)

INTERESTS

- TF2/CS level design using Steam SDK
- Rock climbing (7b)
- Tabletop RPG Game Master and miniature painting
